PREFACE

The purpose of the Washington State Data Book is to present, in one reference document, a diversity of information on Washington, its people, economy, and government. The information is obtained from state and federal agencies as well as private business.

The Data Book contains eleven major chapters: Population, Economy, State Government Finance, Human Services, Criminal Justice, Education, Natural Resources, Environment, Energy, Transportation, and Local Government and Special Districts. These sections represent the type of information most frequently requested by a broad range of users.

It would be impossible to compile and publish the Data Book without the cooperation of the contributing agencies. Therefore, we thank those agencies and their research staff, professional and clerical. Agency names, addresses, general information telephone numbers, and reference publications are listed in the Contributing Agencies section.

Every effort is made to ensure the accuracy of the data presented in the Data Book. Because the Data Book is only published every two years, much of the material is subject to frequent updates and changes and these data should not be cited as the most recent official agency information.

DATA NOTES

Many data series published in the Data Book are available in separate publications released by the contributing agencies. These source documents generally provide updated data on a more frequent and detailed basis than the Data Book. The source documents also provide data definitions and user information not included in the Data Book due to lack of space.

Please contact the contributing agency for additional data, explanations, or updated information. The contributing agencies, their addresses, telephone numbers, and some available publications are listed starting on page 283.

A County Sources and Footnotes page for the county profiles is located on page 272.

Unless otherwise noted, the time periods in this publication are either calendar year or fiscal year. The following types of fiscal year are used in the tables:

State Fiscal Year - July 1 through the following June 30;
Federal Fiscal Year - October 1 through the following September 30;
School Fiscal Year - September 1 through the following August 31.

Financial data are in current dollars unless otherwise noted.

[1] Includes Japanese, Chinese, Filipino and Other Asian categories.

[2] Mexican/Chicano category not reported separately until 1980. Some persons of Spanish heritage classify themselves as racially white.

[3] Other and Unknown categories combined.

Note: The determination of race on birth and death certificates follows decision rules established by the National Center for Health Statistics, (NCHS), U.S. Department of Health and Human Services. These rules differ from those of the Bureau of the Census, U.S. Department of Commerce. In mid-1988, the Mexican/Chicano category was expanded to include all other Hispanic groups previously classified as White.

[1] Fiscal year ends on August 31 except prior to 1978 when the fiscal year ended on June 30.

[2] Beginning on January 1, 1975, regular property tax is collected by the state and is shown as a state fund. Local property tax shown for this and subsequent years is special levy revenue only.

[3] Fiscal Year 1979 was beginning of the basic education funding formula and property tax levy limits.

[4] Effective September 1, 1981, school districts no longer received County Real Estate Transaction Tax. The responsibility for collecting those revenues was transferred to the Washington State Department of Revenue. The funds continue to be used to support K-12 education.

[1] Boat trailer registrations, identified as such, ended in September 1979. They are now registered as "personal" trailers and cannot be identified as recreation vehicles.

[2] Prior to late 1975, motor homes were registered as passenger cars.

[3] Registrations for 1977 are exaggerated by the requirement to register some vehicles twice to institute the revolving biennial registration system.

[1] Wastes that are typically thought of as waste going for treatment and disposal. These wastes are usually of higher concentration and/or toxicity, and clearly represent a potential threat to public health and the environment.

[2] Includes wastes imported from out-of-state generators.

[3] Storage methods include container, tank, waste pile, surface impoundment, and other storage.

[4] Disposal methods include landfill and surface impoundment.

[5] Treatment methods include biological, chemical, physical, and thermal.

[6] Chrome wastewater only. Does not include National Pollutant Discharge Elimination System (NPDES) and Metro pretreatment.

Note: Hazardous waste data do not include radiation waste or the superfund cleanup wastes from past practices.

[1] Issued by local governments for development on shorelines which cost $2,500 or more.

[2] Issued by WDOE when there are practical difficulties or unnecessary hardships in the way of carrying out the strict letter of the master programs.

[3] Issued by WDOE to provide more control and flexibility for implementing the regulations of the master program. Data for 1971-1976 combined with variance category.

[4] Washington State Department of Ecology.

Note: There are appoximately 20,634 miles of shorelines which come under the purview of the Shoreline Management Act of 1971.

[1] All prices are for furnaces operating at 100 percent efficiency. Valid comparisons of fuel prices by type of fuel should take furnace efficiency into account.

[2] Puget Power serves Jefferson, King, Kitsap, Kittitas, Pierce, Skagit, Thurston, and Whatcom Counties.

[3] Washington Water Power serves Adams, Lincoln, Spokane, Stevens and Whitman Counties and parts of Idaho.

[4] Pacific Power & Light serves Columbia, Garfield, Walla Walla, and Yakima Counties.

[5] Seattle City Light serves the city of Seattle and some surrounding areas.

[6] Tacoma Public Utilities serves Pierce County.

Note: Power companies do not necessarily serve entire county areas.

[1] One barrel equals 42 gallons.

[2] Includes residential heating oil, diesel, and miscellaneous others.

[3] The large increase in kerosene consumption does not reflect a proportionate increase in consumption. Due to reporting procedures before 1983, kerosene consumption was often included in other categories.

[4] Liquid petroleum gas.

[5] Includes asphalt and road oil, lubricants, and miscellaneous products.
